PROFESSIONAL SUMMARY

Entry-level Cybersecurity Analyst specializing in Vulnerability Assessment & Penetration Testing (VAPT) and Security Operations (SOC). Hands-on experience solving Capture The Flag (CTF) challenges and exploiting web vulnerabilities (SQLi, XSS, CSRF) via PortSwigger labs aligned with OWASP Top 10. Skilled in vulnerability scanning, incident analysis, and translating technical findings into actionable remediation strategies.

TECHNICAL SKILLS

- **VAPT & Offensive Security:** Vulnerability Assessment & Penetration Testing (VAPT), OWASP Top 10, Web App Security, Risk Analysis & Remediation
Tools: Burp Suite, OWASP ZAP, Nmap, Nessus, Metasploit
- **SOC & Defensive Security:** Security Monitoring, Log Analysis, Incident Triage, Network Traffic Analysis, CVSS (Foundational)
Tools: Wireshark, Autopsy, FTK Imager
- **Lab Platforms:** DVWA, Metasploitable, CEH Labs, PortSwigger Web Security Academy, CTF Platforms
- **Programming:** Python, JavaScript, PHP, C, HTML, CSS

EXPERIENCE

Cybersecurity Intern | Sysap Technologies
Nov 2025 – Present

- Conducted **vulnerability scanning and assessment** using Nmap and Nessus to identify system and web application weaknesses.
- Performed **web application penetration testing** in controlled lab environments following **OWASP methodology**.
- Assisted in **security event analysis and network traffic inspection** to understand potential threats and attack patterns.
- Documented findings in **structured VAPT and security assessment reports**, including risk impact and remediation guidance.

PROJECTS

PortSwigger Web Security Labs (SQLi, XSS, CSRF)

- Successfully solved multiple labs covering SQL Injection, Cross-Site Scripting (Stored, Reflected), and CSRF attacks
- Used Burp Suite to intercept, manipulate, and exploit HTTP requests and responses
- Understood real-world attack scenarios including authentication bypass and session exploitation

DVWA – Web Application Security Testing

- Identified and exploited **SQL Injection, XSS, and CSRF** vulnerabilities.
- Mapped findings to **OWASP Top 10**, assessing severity and mitigation steps.
- Prepared detailed vulnerability assessment reports with risk classification.

CEH Practical Assessment Report

- Created a detailed report covering reconnaissance, exploitation, and post-exploitation phases.
- Included **tool usage, attack vectors, risk analysis, and security recommendations** aligned with industry practices.

EDUCATION

Bachelor of Science [Cyber and Digital Science] | 2023 - 2026

Pratibha College of Commerce & Computer Studies

12th –UP Board

B.R.K. Inter College

CERTIFICATIONS

- Certified Ethical Hacker (CEH) v13
- Cisco Certified Network Associate (CCNA)
- Computer Hacking Forensic Investigator (CHFI) v11
- Certified Cyber Security Professional Program - ICTRD

KEY ACHIEVEMENTS

- Solved multiple CTF challenges involving web exploitation, reconnaissance, and privilege escalation techniques
- Exploited SQLi, XSS, and CSRF vulnerabilities in PortSwigger and DVWA labs using Burp Suite
- Developed structured VAPT reports aligned with OWASP standards
- Gained hands-on experience in both offensive and defensive cybersecurity domains

ADDITIONAL

- **Languages:** English, Hindi, Marathi
