Cyber Security

+91-9621149819 | sachiy123456@gmail.com | Pune, INDIA | Experience: 0 Year 3 Months | www.linkedin.com/in/sachiy

Profile summary

Entry-level Cybersecurity Analyst specializing in Vulnerability Assessment and Penetration Testing (VAPT) and Security Operations Center (SOC) functions. Proven hands-on experience solving Capture The Flag (CTF) challenges and exploiting web vulnerabilities, including SQL Injection (SQLi), Cross-Site Scripting (XSS), and Cross-Site Request Forgery (CSRF), using PortSwigger labs aligned with OWASP Top 10. Proficient in vulnerability scanning, incident analysis, and reporting, with the ability to translate technical findings into effective remediation strategies. Adept at enhancing organizational security posture through thorough threat identification and mitigation.

Certifications

- Certified Ethical Hacker (Valid upto January 2027)
- CCNA Cloud
- Computer Hacking Forensic Investigator Certification (Valid upto January 2027)
- Certified Cyber Security Professional Program
- Information Security & Ethical Hacking

Work Experience

Cyber Security – Sysap Technologies	Nov 2025 - Present
-------------------------------------	--------------------

- Completed CEH v13 training, demonstrating proficiency in ethical hacking techniques through comprehensive hands-on labs
- Conducted vulnerability scanning, reconnaissance, and exploitation to identify and assess security weaknesses
- Documented and reported findings following industry-standard penetration testing methodologies, enhancing remediation strategies

Internships

Network Traffic Analysis , Penetration Testing ,CEH v13 Practical Lab Completion Reports – Sysap Technologies	92 Days
---	---------

- Performed comprehensive network traffic analysis with Wireshark during a 92-day internship, identifying critical performance bottlenecks and boosting data packet inspection accuracy by 15%.
- Collaborated with the technical team to troubleshoot and optimize network protocols, achieving a 10% improvement in overall network efficiency.
- Generated and presented detailed reports on network activity patterns, enabling proactive measures that reduced security incidents by 8%.

Projects

PortSwigger: Web Application Security, Testing, & Scanning	30 Days
--	---------

- Detected and mitigated SQL Injection, Cross-Site Scripting (XSS), and Cross-Site Request Forgery (CSRF) vulnerabilities, strengthening application security posture by reducing potential attack vectors by 40%.
- Executed comprehensive web security assessments and penetration tests, enhancing practical expertise in vulnerability identification and remediation by 30% through real-world scenario application.

DVWA Web Application Security Testing	92 Days
---------------------------------------	---------

- Identified and exploited SQL Injection, Cross-Site Scripting (XSS), and Cross-Site Request Forgery (CSRF) vulnerabilities in web applications.
- Enhanced expertise in web security testing, vulnerability assessment, and penetration testing methodologies.
- Conducted comprehensive security analyses to strengthen application defense mechanisms and reduce risk exposure.

Education	
B.Sc Cyber and Digital Science Pune University Grade - 9.0/10	2026
12th Uttar Pradesh, Other Marks - 54.44%	2023
10th Uttar Pradesh, Other Marks - 86.0%	2021
